Web Publishing: Using the Connect Bar Functionality in the WCM

Overview

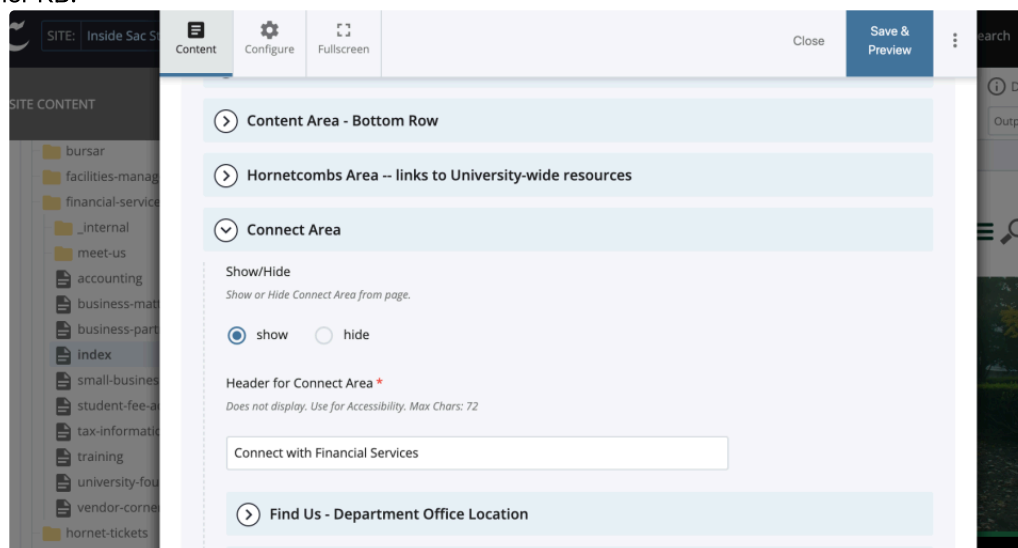

The connect bar is an area towards the bottom of the T4 page that allows anyone visiting the page to know where to find that office on campus, the hours the office keeps, the phone number, and an option to look at a roster of employees and their position in the "Meet Us" section.

Instructions

To add to or edit the contact bar:

- Navigate to your T4 page in the WCM
- Click the "Edit" pencil at the top-right of the page, and then scroll down until you reach "Connect Area."
- Select the arrow to the left of "Connect Area," and make sure the "Show/Hide" menu is set to "Show."
- Make sure there is something written in the "Header for Connect Area." This will not display anywhere on the page but is necessary for accessibility purposes.

There are four areas that make up the connect bar: Find Us, Contacts Us, Meet Us, and Follow Us. "Meet Us" will be covered in another KB.

- Make sure the sections in Find Us are filled out are much as possible. There are a few formatting notes in this section that need to be followed: under "Building Name Location of Department Office," write out the full name of the building, and follow it with a comma and the room number. Do not fill out the room number in the next line down. Any lines left blank will not show on the page.
- Under "Contact Us," put the phone number for the front desk phone or administrative support assistant if available.

- The “Follow Us,” section can include links to your department or office's social media. This section can also be left blank or can include social media links for the University.
- Save and preview your page. Verify that the information is correct and then republish the page.
