## Web Publishing: How to Login to the WCM

### Overview

Once you have completed the Web Publishers Canvas training course and you are provisioned in, there are two ways to start editing a webpage in the WCM: login via the Green Dot Shortcut or login via CascadeCMS.com. This article lists instructions for both.

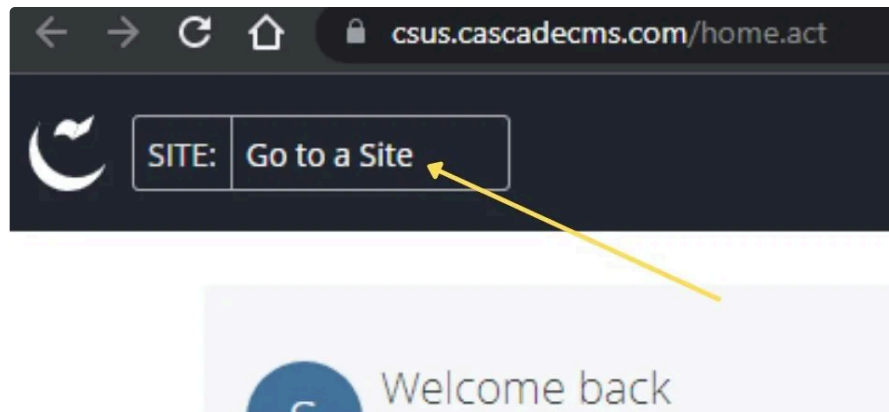

### How to Login via the Green Dot Shortcut

If you know exactly what page you wish to edit on the site, simply navigate to that page and scroll to the very bottom. There is a small green dot on the left side of the footer. Clicking this dot and logging in with your Sac State username and password will take you directly to the page's location inside the WCM, allowing you to edit it without searching through the drop down menu.

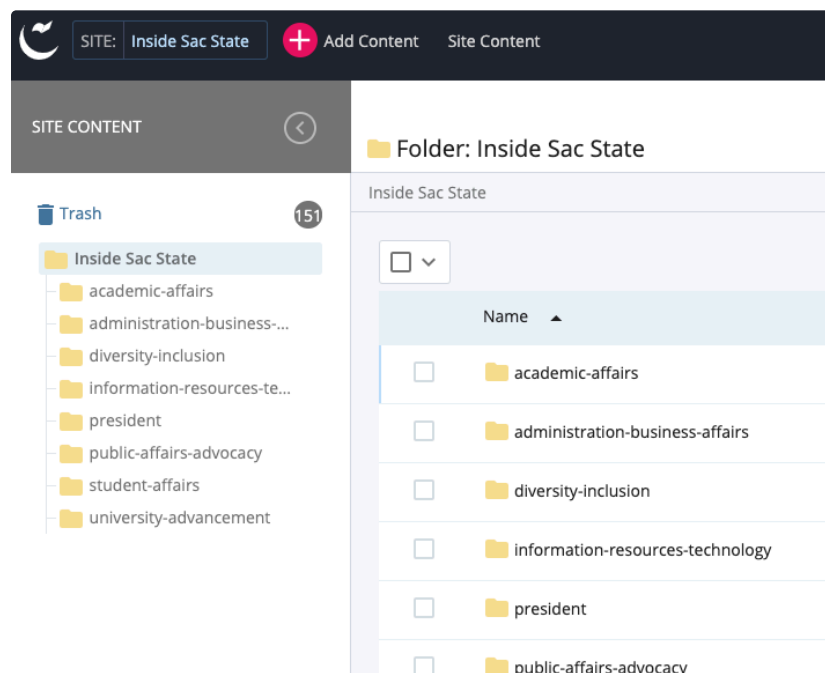

### How to Login via CascadeCMS.com

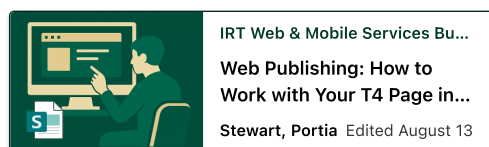

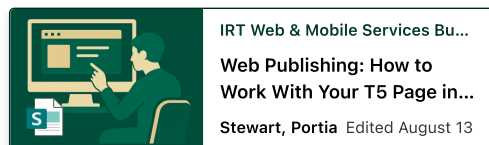

- Open a browser and navigate to <https://csus.cascadecms.com/>. Feel free to bookmark the link now for easier access later.
- Login with your Sac State username and password.
- Navigate to Site: Go To Site in the upper left-hand corner

- From the drop-down menu, select your area.
